## **Thomas Fehlmann**

Dr. Thomas Fehlmann works as Senior Researcher for Euro Project Office in Zurich.

He worked in Software Development since 1981 and as Quality Manager for software development since 1991. He received the Akao price for contributions to Quality Function Deployment in 2001. In 1999, he started the Euro Project Office AG in Zurich that meanwhile has an excellent reputation for product quality management all over in Europe. He adapted Six Sigma for Software based on software metrics for functional size, for software testing and defect prevention and has contributed many ideas to the community. He is engaged in Autonomous Real-time Testing, the new software testing technique for complex software-intense systems and specifically for systems embodying Artificial Intelligence.
