

Biographical Note

Ricardo Santos

Ricardo Santos

Ricardo Jorge Santos (male) (ricardojorge.santos@edp.pt) is an electrical engineer who specialized in power systems, has a degree in project management and is an MBA graduate. From 2006 to 2010, he worked at ABB as a substation protection and control specialist. He joined EDP Distribuição in 2010, working in the physical asset management area. In 2014, he joined the innovation and technology department as project manager, mainly in projects related with energy storage, smart grids, and renewable energy. From February of 2018, he became responsible for the innovation department of EDP Distribuição, as an associate director, becoming responsible for the coordination of several internal and international innovation projects addressing several issues on the strategic, technical, regulatory and economic dimensions of the companies' business.
